

CEREAL GRAINS

Barley

DESCRIPTION

Barley is the fourth most produced grain worldwide and is commonly used in petfood diets. Barley is a great source of both soluble and insoluble dietary fiber. It is commonly used as an alternative to rice as it is high in carbohydrate content as well, although due to the fiber content, it has one of the lowest glycemic indexes of all of the cereal grains.

APPLICATIONS & FUNCTIONAL BENEFITS

- Excellent source of dietary fiber.
- Good source of potassium, phosphorus, magnesium, and B vitamins.

USAGE RECOMMENDATIONS

Use as a carbohydrate source and an alternative to brown rice in pet food diets.
