

## PULSES

# Lentils

### DESCRIPTION

Lentils are a legume crop that have been cultivated for over eleven thousand years and are a great source of nutrients. Lentils are high in dietary fiber and crude protein as well as being rich in folic acid (vitamin B9), phosphorus, iron, and zinc. Due to their low carbohydrate content, lentils have a low glycemic index. Lentils are an excellent plant-based protein in petfood diets.

### APPLICATIONS & FUNCTIONAL BENEFITS

- High in protein, dietary fiber, folic acid, iron, and potassium.

#### Quality Ingredients Make for Quality Foods

The Andersons is committed to ensuring a consistent supply of ingredients. Starting with selecting high-quality, fresh ingredients and concluding with quality assurance every step of the way from farm to bowl.

For over half a century, The Andersons has been supplying North America with feed and food ingredients for a wide array of industries. Our ingredient team works hard to find the best possible balance between quality, reliability of supply, and cost. Connect with us now to work together to create a custom plan that works for you.
