

YEAST

Dried Yeast

DESCRIPTION

Dried Yeast (*Saccharomyces cerevisiae*) is a product produced by fermentation where the resulting yeast components are separated from the fermentation substrate to produce a non-viable yeast product. It will contain high levels of many of the B vitamins, as well as being rich in protein and essential amino acids. It contains a minimum of 49% crude protein and is high in many of the B vitamins. Dried yeast is great tasting and can be used as a palatability agent in both cat and dog food diets.

APPLICATIONS & FUNCTIONAL BENEFITS

- Excellent source of protein.
- High in many of the B vitamins.
- A source of nucleotides.
- Great palatability enhancer.

Quality Ingredients Make for Quality Foods

The Andersons is committed to ensuring a consistent supply of ingredients. Starting with selecting high-quality, fresh ingredients and concluding with quality assurance every step of the way from farm to bowl.

For over half a century, The Andersons has been supplying North America with feed and food ingredients for a wide array of industries. Our ingredient team works hard to find the best possible balance between quality, reliability of supply, and cost. Connect with us now to work together to create a custom plan that works for you.

USAGE RECOMMENDATIONS

Use as a pallatant for dry pet foods, or as a protein source in petfood diets.

PHYSICAL PROPERTIES

Color & Appearance: Tan to brown or light yellow

Texture: Free flowing powder

Odor/Flavor: Yeasty or beer-like odor

Moisture: 5.0% max

SHELF LIFE & STORAGE REQUIREMENTS

24 months when stored unopened in a cool and dry environment.

PACKAGING

Bags or totes.

NUTRITIONAL INFORMATION

Moisture	3.24%
Fat	3.4%
Fiber	6.0%
